(54) LIQUID CRYSTAL DISPLAY

(57)Abstract:

PROBLEM TO BE SOLVED: To solve such a problem that viewing angle characteristics of white display and contrast are insufficient when a driving method in which a high voltage is periodically applied so as to keep bend alignment even in the case where the applied voltage is low in a liquid crystal display using an OCB liquid crystal.

SOLUTION: An applied voltage for black display, a periodically applied high voltage and an applied voltage for white display are set for every display color.

LEGAL STATUS

[Date of request for examination]

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number]

[Date of registration]

[Number of appeal against examiner's decision]

of rejection]

[Date of requesting appeal against examiner's
decision of rejection]

[Date of extinction of right]
